## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sano et al in view of the cumulative teachings of Clarke, Carroll et al, Bump Jr. et al and Darago for the reasons of record.

3. Applicant's arguments filed 10-30-02 have been fully considered but they are not persuasive.

Applicants argue that none of the cited references teach a layer which is light active and acts without external energizing to change the properties of incident light. However the examiner must give terms their broadest meaning and look to the specification for any definition. Indeed the specification has no definition. Light shed on the terms meaning comes only from page 2 where the term seems to indicate an absence of external electrical energizing as in US 5005306. The specification goes on to include luminescent properties, light reflecting properties, and contrasting colors. This is precisely what is disclosed in the secondary references used. See Clark Col 1 lines 14-17, Bump Jr. Col 3 lines 58-59, and Carroll et al Col 1 lines 68-73. Reflected incident light on a colored surface , including black and white, will have different properties than

the original incident light; this is the basis of color theory, ie some wavelengths are absorbed.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stevan Resan whose telephone number is 703-308-4287. The examiner can normally be reached on Tuesday-Friday; 7:30 am-6:00 pm.
